- Healthcare

### Available Regions

- U.S. / Canada
- Europe

### Supported Products

- Spectralink PIVOT (87-Series)

### Capability Summary

- Nurse handoffs
- Clinical integration

## The Handoff Company - Caringly

### Quantified handoffs improve patient safety and clinicians work life

The Handoff Company develops solutions for safe, standardized and efficient patient handoffs. The portfolio of applications from The Handoff Company aim to mitigate the impact of patient handoff failures at transition of care along the patient care continuum. Handoff failures are responsible for medical errors that lead to complications and even death. Inadequate handoff communication also contributes to extended shift hours and job dissatisfaction among clinicians.

Caringly is an award-winning HIPAA-compliant application from The Handoff Company that facilitates patient handoff between **nurses at shift change**. Caringly is available as a SaaS application on PIVOT by Spectralink. Caringly is optimized for nurse shift change workflow by being available on the PIVOT mobile device. Currently, patient handoff between nurses typically occurs using paper or tab-hopping through electronic medical records (EMR). These approaches fail to Caringly is a perfect application to welcome PIVOT into a hospital or skilled nursing facility for best patient handoff experience for nurses.

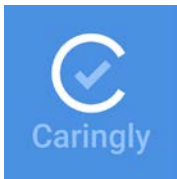

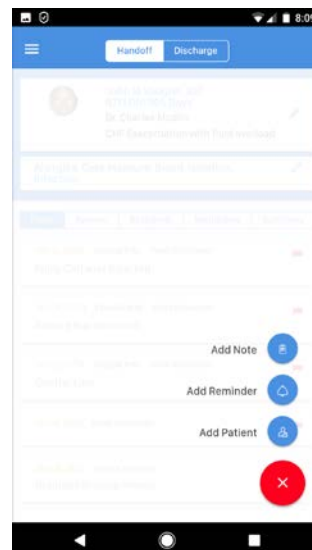

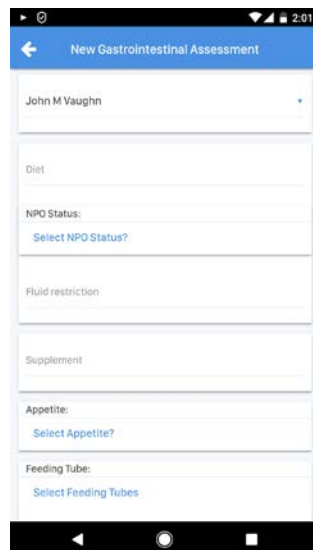

### Benefits

Nurses use Caringly to collaborate and communicate about handoffs at shift change.

- Caringly captures in real-time and quantifies the information exchanged at handoff.
- Caringly uses checklist approach to create a step-by-step handoff process.
- The structured handoff with Caringly enhances the ability of the outgoing nurse to clearly communicate most relevant information about a patient.
- The structured handoff with Caringly enhances the ability of the incoming nurse to synthesize critical and contextual information about the patient.
- Caringly makes it very easy to flag pertinent information about a patient.
- Caringly is customizable for unique handoff needs of any hospital unit.

### System Overview

- EHR integration
