

## **Spectralink Brings Award-winning Enterprise Mobility Solutions and Research to Cisco Live! Las Vegas**

*SolutionsPlus Solutions Unify People, Processes and Data*

BOULDER, CO —June 22, 2017 – [Spectralink Corporation](#), the global leader in enterprise mobility solutions, is bringing its [PIVOT: SC™ \(8744\)](#) enterprise-grade smartphone and portfolio of flexible, scalable DECT (Digital Enhanced Cordless Telecommunications) solutions to Cisco Live! Las Vegas 2017. At the show, the company is also distributing a 2017 research report on the PIVOT: SC's advanced camera/barcode scanner capabilities and celebrating the award-winning status of this solution.

A CISCO SolutionsPlus Preferred partner, Spectralink will be demoing the ruggedized PIVOT:SC in Booth 2933 that is based on the Android™ OS, with Google™ certification. It will also be showing its DECT portfolio with multiple IP, digital and hybrid handset options to flexibly meet the needs of mobile workers. Both product lines integrate with the Cisco Unified Communications Manager (CUCM) and Cisco Hosted Cloud Solution (HCS). The PIVOT:SC also supports Cisco Spark to bring together people, processes and data that enhance productivity and improve collaboration.

Since Spectralink joined the SolutionsPlus program in early 2016, the relationship between Cisco and Spectralink has strengthened to offer a comprehensive and diverse portfolio. Cisco and its partners can offer customers the only Cisco-certified enterprise mobility solutions that include the PIVOT:SC, DECT handsets and servers, handsets, accessories and support – all directly available on the Cisco Global Price List (GPL). These solutions empower mobile workforces in healthcare, retail, manufacturing and hospitality to do their jobs more effectively and efficiently.

“Spectralink is very pleased with our growing relationship with Cisco, and we’re looking forward to participating in our second Cisco Live! Las Vegas event,” said Ashish Sharma, CMO of Spectralink. “Our enterprise mobility solutions have been beneficial to Cisco and its partners in helping their customers mobilize their workforces.”

The PIVOT:SC camera/scanner's speed and accuracy was recently verified by independent research conducted by [The Tolly Group](#), who compared the PIVOT:SC 8744 to the Zebra MC40. Test results showed that the Spectralink PIVOT:SC had a faster average scan time than the dedicated hardware-based Zebra MC40. Testing also showed that the Spectralink PIVOT:SC recognized more symbologies than Zebra at 37 to 24, and could match Zebra's scanning

accuracy when angled 15 degrees. To view the report, click [here](#). Copies will also be available in the Spectralink booth.

In addition, The PIVOT:SC and its new camera/barcode scanner were recognized with a [2017 INTERNET TELEPHONY Product of the Year Award](#) from TMC, a global, integrated media company. These awards recognize the most innovative and highest quality IP communications brought to market, or updated, in the past year.

**About Spectralink:**

Spectralink leads the enterprise mobility market with industry's most deployed mobility solution portfolio optimized for mission critical healthcare, retail, manufacturing and hospitality applications. As the enterprises transition to mobile workflows, Spectralink is at the forefront of the industry transformation through its innovative end-to-end mobility portfolio. Designed for challenging RF environments, our mobile solutions enable enterprises to streamline their workflows and deliver a positive customer experience. To protect our customers' investments in UC platforms, we offer the best interoperability in the industry with the leading call control platforms. Since 1990, Spectralink has deployed millions of mobile devices worldwide – providing enterprises with the industry's most reliable, high quality and secure mobility solutions.
