Multitone Electronics plc

Specialist in the development and delivery of bespoke integrated messaging solutions.

We are specialists in the development and delivery of a range of bespoke messaging, alarm management and application solutions, to support the communication strategies of diverse organisations within the following markets, Healthcare, Manufacturing, Hospitality, Industry and Retail.

Our solutions are designed to keep pace with the ever-changing world of technology and to provide a platform for future innovation, in alignment with customer's specific communications needs. Our offering ranges from off the shelf applications to creating bespoke systems whilst working in conjunction with our partners.

Benefits

The Multitone i-Message family offers a device and network agnostic messaging and integration platform with full resilience and modular deployment.

- Seamless communication and messaging platform
- Improve organisational effectiveness, communication workflow, on-site and wide area
- Supporting device and network consolidation to reduce on-going costs
- Enhance overall user experience and safety
- Ensure corporate and national governance

System Overview

Multitone's Messaging solutions fully support native integration with the Spectralink product portfolio, with XML messaging support for the Spectralink 70-Series, SpectraLink 84-Series and Spectralink PIVOT 87-Series. Multitone @ppear offers a dedicated secure, encrypted, real-time media rich messaging application for use with the Spectralink PIVOT devices.
