Televic Healthcare Solutions

**Your partner for patient Safety,
Communication & Comfort for the
healthcare market**

Televic Healthcare is a part of Televic group. It's mission: Wherever critical communication needs technology, Televic enables it. We have developed high-end communication solutions for specific niche markets for more than sixty years, and that will remain our mission.

Televic Healthcare makes nurse call systems for the healthcare vertical (niche). Due to the specific needs of this vertical, Televic made a specific alarm server, called Axio Mobility. Our latest version of Axio Mobility, version 2.0, also supports the Voice over Wi-Fi range of Spectralink mobility solutions. With over sixty years providing mission-critical healthcare alarm solutions, to hundreds of hospitals, clinics and elderly care homes, we have the experience to deliver the patient safety and communication solution you need.

BENEFITS

Patient centric call alarming with immediate action possibilities

Immediate action possibilities with added value:

- Call back
- Camera integration
- Map-view

Call distribution fully configurable

Priority control on the alarming: instead of FIFO alarm systems, using the gravity of the alarm to be pushed higher or lower in the list

End-to-end monitoring of the alarm flow (technical life-check)

Logging of the alarm flow

Specially built for Spectralink devices Pivot (Android-app) and 84-series (native XML call handling)

Specific link with Zembro® outdoor solution for outdoor senior safety

System Overview

Spectralink integration is built into the server simplifying deployment on Spectralink PIVOT smartphones by allowing the Android App to connect to the AxioMobility 2.0 server using its proprietary protocol. For the Spectralink 84-series Wi-Fi handsets the webserver and websocket server are built into the AxioMobility 2.0 server, allowing immediate communication.

Introducing Spectralink Solutions

Spectralink enables modern healthcare by providing clinical mobile devices that seamlessly integrate with hospital networks and leading healthcare applications such as Televic solutions deployed via their state-of-the-art AxioMobility server. The result? Improved workflows, better communication among care team members, and more efficient resource deployment.

Spectralink's mobile devices are designed specifically for healthcare, and offer unmatched voice quality and secure, access to patient information at the point-of-care. Clear communication among care team members improves care co-ordination, reduces the potential for errors, and enables clinicians to spend more time with their patients.

87-SERIES PIVOT

With an intuitive touchscreen interface, PIVOT (87-Series) enterprise smartphones are based on the Android™ operating system, and provide an open platform to support leading AxioMobility applications. Get efficiency, security and reliability all in one award winning device.

The PIVOT family consists of:

PIVOT:S (8742)

Has a streamlined design with a slim profile for a familiar smartphone feel.

PIVOT:SC (8744)

Incorporates an 8-Megapixel camera and offers an optional camera-integrated barcode scanner.

PIVOT:S (8753)

Includes an integrated, high-performance 1D/2D barcode scanner.

84-SERIES PIVOT

With market-leading HD voice quality, durability, broad telephony and WLAN interoperability, the Spectralink 84-Series Wi-Fi enterprise solution delivers a superior user experience with Spectralink VQO (Voice Quality Optimization).

The 84-Series includes:

8440

Baseline VoWLAN product with enterprise-grade onsite voice mobility.

8452

Adds an integrated barcode reading capability.

ABOUT TELEVIC:

Televic Healthcare are part of an international company, headquartered in Belgium, developing and manufacturing superior healthcare solutions.
