

Spectralink Achieves Validation on ShoreTel Unified Communications Platform

Boulder, Colo. and Sunnyvale, Calif. – November 21, 2013 – [Spectralink Corporation](#), a global leader in wireless solutions, and [ShoreTel®](#) (NASDAQ: SHOR), the leading provider of brilliantly simple [unified communications systems](#), announced today that Spectralink products achieved validation for ShoreTel's [Unified Communications Platform](#).

As a member of ShoreTel's [Innovation Network](#), Spectralink's [84-Series Wi-Fi Wireless Telephones](#) and 7000 DECT Portfolio handsets along with the [IP-DECT Server 400](#) and [IP-DECT Server 6500](#) were tested and validated by ShoreTel for interoperability with ShoreTel's published interfaces.

"The validation by ShoreTel gives customers confidence that our products have met the highest standards for interoperability and performance," said Sten Dyrmoose, CEO of Spectralink. "It's important that Spectralink integrates with market-leading UC manufacturers to ensure that our solutions support industry leading unified communication systems."

With this announcement, ShoreTel's platform is now compatible with Spectralink's leading [Wi-Fi](#) and [DECT](#) workplace wireless communication solutions, which enable in-building mobile personnel like nurses, retailers and manufacturers to easily connect with customers, colleagues, and all the applications they need to perform their best. The Spectralink wireless solutions deliver enterprise-grade on-site voice mobility, with HD voice quality, durability, and broad telephony and wireless infrastructure interoperability. Tying into your telephone system, voice mail and directories, the Spectralink solutions also support text alerts and instant messaging.

About Spectralink

Spectralink, a global leader in wireless solutions, solves the everyday problems of mobile workers through technology, innovation and integration that enable them to do their jobs better. By constantly listening to how customers move through their workdays, Spectralink is able to develop reliable, enterprise-grade voice and data solutions and deliver them through a powerful, durable device.
