

Spectralink Hires Global VP of R&D

--Industry Veteran Brenda Budzynski Brings 25 Years of Innovation Expertise--

BOULDER, COLO., APRIL 10, 2013— Spectralink Corporation (“Spectralink”), a global leader in wireless solutions for the workplace, has announced that Brenda Budzynski will join the company as the new VP of Global R&D.

Budzynski has spent the last 25 years in telecommunications, 21 of those years at Alcatel-Lucent, Bell Labs and AT&T, in engineering management where she was focused on business transformation and operational excellence. She brings a broad understanding of business from production to manufacturing to services, and has a deep appreciation of running organizations that span multiple countries, time zones and cultures.

“We are delighted to have someone of Brenda’s caliber join our executive team,” commented Sten Dyrmoose, President & CEO of Spectralink. “Her strong engineering background, coupled with her experience working with companies with operations in multiple countries, will help us best leverage and define our global engineering organization. Brenda’s experience in creating innovative products, solutions and services will drive us towards our company promise of continual innovation for our customers and partners.”

In addition to more than two decades with Alcatel-Lucent, Budzynski has also recently held executive management roles at JDSUniphase (JDSU) and TeleCommunication Systems (TCS). She holds a Bachelor of Science in Engineering from Clemson University, along with numerous industry awards and certifications.

“I am excited to join Spectralink and add immediate value to the mission of creating solutions that solve the everyday problems of the mobile worker,” said Budzynski. “I am excited to integrate with the very talented engineering teams and immediately begin to listen to our customers and partners to deliver innovative, ground-breaking solutions.”

About Spectralink

Spectralink, a global leader in wireless solutions, solves the everyday problems of mobile workers through technology, innovation and integration that enable them to do their jobs better. By constantly listening to how customers move through their workdays, Spectralink is able to develop reliable, enterprise-grade voice and data solutions and deliver them through a powerful, durable device.
